

Ag Aviation Career Details

Learn About a Career in Ag Aviation

Being an ag pilot is one of the most exciting jobs in aviation. It requires tremendous skill and attention to detail. Those who make the cut will find a rewarding career with opportunities and experiences which exist in nowhere else in aviation.

Requirements include earning a commercial pilot license, obtaining a Class II Medical Certification (annual examination); being trained and tested in agricultural aircraft operations, having a state-administered EPA commercial pesticide applicator license; and meeting the requirements for insurance in the aircraft and type of flight operations.
